(54) OPENING AND CLOSING GUIDE MECHANISM FOR WINDOW GLASS

(57)Abstract:

PURPOSE: To eliminate the looseness of a guide mechanism for a window glass of a vertical opening/closing type window, and to secure the smooth opening and closing of the window glass.

CONSTITUTION: In a connection part of a channel 5 of a window part and a lower sash 7 of the lower side of the window part, a joint 9, to which the lower end of the channel 5 is fitted, is fitted to the upper end of the lower sash 7, and openings 9A, 9B are provided in both side walls of the joint 9, and divided parts 8A, 8B, which are formed by dividing the upper end of a lower glass run 8 to two-branch shape, are fitted in the openings 9A, 9B in the condition that the lower glass run 8 is opened upward, and the lower end of the channel 5 is pushed to the divided parts 8A, 8B so as to eliminate the looseness.
